Far back into the mists of time, in civilisations long forgotten, there were those who had been initiated into the mystery schools of transcendent knowledge. The wordsearch played a crucial role, and the hidden words were of great significance for the initiated. They symbolised the hidden truths hiding among the profane lower worlds.

A trial is overcome, another lies ahead. Perhaps through your labours you have come to understand the mystery of the outline. But you must prove yourself. Confront the mystery of the outline, and fill its stubborn borders with colour and life. Use your pen to bring truth unto paper. Creative passion will be the engine launching you towards transcendence.

The labyrinth is one of the greatest trials of them all. It is more than just a puzzle. It is a symbol of the journey inward. Do you have what it takes to find the centre? Or are you doomed to the fate of ghosts, wandering through the lonely paths of the labyrinth, forever lost?

EXPLANATION:

You have overcome so much hardship, and have finally arrived at the last trial. Many initiates have overcome the former trials, only to fall at last in the wake of this bad boy. Here you shall be tested to within an inch of your life. For only the greatest may succeed...

This is a C++ script for my character's jump in a Unity game I'm working on. The code won't compile, please explain why.

Congratulations! You have gone BEYOND THE BRAIN, and drank from the cup of transcendent wisdom. You should be very proud of yourself. Check out these vouchers! You have certainly earned them.
